PROFILE SUMMARY

Software Engineer with over 7 years of experience in application and web development, primarily as a backend developer. Proficient in all phases of the software development lifecycle, from gathering requirements to deployment and maintenance. Motivated to grow with technically advanced and challenging organizations.

AREAS OF EXPERTISE

- - Designing, implementing, and managing software systems.
- - Gathering and understanding user requirements.
- - Testing and evaluating software modules.
- - Developing new applications and tools.
- - Deploying and maintaining software systems.
- - Troubleshooting and resolving errors.
- - Team coordination and planning.
- - Data scraping and automation.

PROFESSIONAL EXPERIENCE

Sr. Python Developer

Ocius Technologies, Ahmedabad | August 2020 – Present

- Lead development and maintenance of multiple backend applications.
- Experience with Airflow, FastAPI, data scraping, PostgreSQL, Kafka, and AWS tools.

Software Engineer

Space Application Centre, ISRO (via GlobalTech(I) Pvt. Ltd.), Ahmedabad | October 2016 – October 2019

- Contributed to web-based applications for satellite data visualization, automation, and analysis.
- Technologies included Java Swing, Django, PostgreSQL, and data monitoring tools.

TECHNICAL SKILLS

- Languages & Frameworks: Python, Flask, FastAPI, Django, Jinja
- Libraries & Tools: NumPy, Pandas, Matplotlib, scikit-learn, Seaborn, BeautifulSoup, Selenium
- Databases: SQL, PostgreSQL, Oracle 12c
- Cloud & Others: AWS S3, Glue, Athena, Kafka, Airflow
- Operating Systems: Windows, Linux (Red Hat, Ubuntu)

EDUCATION

- Deep Learning Specialization - DeepLearning.AI, 2024
- Post Graduate Certification in Data Science – IIIT Bangalore, 2020
- B.E. in Computer Science & Engineering – HJD Institute, Kera (GTU), 2016
- Diploma in Computer Engineering – Govt. Polytechnic, Bhuj (GTU), 2013
- SSC (Class X) – The White Eagle School (CBSE), 2009

PROJECTS

Trend Analyzer – ISRO

Visualizes historical data trends with outlier detection and alerting system.

Tools: Python, Django, Dygraph, PostgreSQL, Red Hat Linux

Product Inventory – ISRO

Maps satellite product metadata and allows export to Excel.

Tools: Java (Swing), NetBeans, Red Hat Linux

Satellite Data Monitoring – ISRO

Automation monitoring and failure management tool for satellite data pipelines.

Tools: Java (Swing), NetBeans, Red Hat Linux

Scraper – Ocius Technologies

Scrapes and converts data from websites into CSV using BeautifulSoup and Selenium.

Tools: Python, Airflow, Jinja, Ubuntu

Recon – Ocius Technologies

Reconciliation tool for structured data across different databases, with UI and APIs.
Tools: Python, FastAPI, Airflow, AWS Athena, Ubuntu

Dag Handler – Ocius Technologies

Event-driven DAG scheduler replacing time-based triggers using Kafka and FastAPI.
Tools: Python, Kafka, FastAPI, Airflow, Ubuntu

PERSONAL DETAILS

- Address: 54, Patel Vas, Devpar-Yax, Ta. Nakhatrana, Dist. Kutch, Gujarat – 370675
- Date of Birth: 23rd November 1992
